# HOW TO START A FIRE

Have you ever felt so enlightened  
Have you ever felt the sun right on your face  
Have you ever felt this light inside you  
Growing further, fire burning

Keep up this fire paving, clearing your way  
Keep up these flames rushing, roaring, speeding up  
Keep up this fire paving, clearing your way  
Don't you ever stop

Keep going, every step of the way you turn around  
Don't hide, everything that you long for will be fine  
Don't mind, coming through is the hardest  
Keep on going, fire burning up

Do you really think they'll ever listen  
Do you really think that this is what you need  
Keep on following the path inside you  
Growing further, fire burning

Keep going on

# D I V E   I N   D E E P

One, two, three steps ahead of time  
Rise to even greater heights  
We don't even know what's yet to come

Living here and now in the eye of time  
Got to reach this point in your life  
Growing up is what you need right now!

You're stuck in your conventions, so get rid of your chains  
Step by step you're getting closer, time will tell

Dive in deep and leave the solid ground  
Build your life the way you want it  
Dive in deep and leave the past behind  
Should I, could I, will I? Sort it out!

Work hard play hard that's the spirit of time  
But you need to get it out of your mind  
Slowing down is what we need right now!

Use your head, do you think you're free?  
Is this really who you wanted to be?  
Stepping up is what we need right now!

# M I L E S   A W A Y

When the wind is blowing in your face  
And your eyes wide opened by this chance  
Miles away, miles away we go

All the roads in front of you  
And you just know where to go  
Miles away, miles away we go

I can't let it go, I won't let it go

Those days are coming, so let them floating in  
All dikes are breaking, just cracking in between  
Our ship is sailing till nothing can be seen  
Till we found our line

When you've got blinded by the light  
And there's no way to make it right  
Miles away, miles away we go

We've got each other leading us through  
We've got tonight and everyone next to you

The time is now, our time is now!

# DANCE

He's been waiting his whole life for something to happen  
Watching life just passing by never used to step in  
There's no turn around inside, not a thing is moving  
Tried to count how many times, but he couldn't fit in

Dance to the beat, it's your time  
Dance to it now, it's so electric!  
Feeling the heart of every sound  
Feeling it growing on you  
Coming together in this crowd, it's so electric!

She did everything they said, but it wouldn't come up  
Swimming with them everyday, never questioned their talk  
There's no turn around inside, not a thing is moving  
Tried to count how many times, but she couldn't fit in

No message, no likes, no meaning!  
No change in sight, don't need it!

# DIARY OF A MOUNTAINEER

High as the mountains, cold as ice  
Keep going further, see you on the other side

Hard as stone, cold as ice  
Keep going further, see you on the other side

Keep going further, hard to survive  
Keep going further, see you on the other side

Melting inside, like fire and ice

# THIS LIFE

Yes Sir! What can I do for you?  
Look alive? Heads down?  
What do you want me to proof?  
Way too long you have been going on  
I've had enough you really can't keep going on

We've come to this and now you read the signs  
We've come to this and now you know it's time  
We've come to this it's time to say goodbye  
Go, baby, run! Everything is alright now!

Cause this life ain't good for me

No Sir! Would you mind sucking it up?  
Sit tight? Stay calm?  
What do you want me to choose?  
Way too long you have been drilling me  
I've had enough I'm finally gonna set me free

We've come to this and now I see the light  
We've come to this so please don't waste my time  
We've come to this it's the end of the line  
Go, baby, run! Everything is alright now!

Sing with me this will make me stronger

# WATCH OUT

They are talking loud, they are talking so much,  
I cannot stand it  
I close my eyes, I shut my ears, so I can bear it  
I don't see anything, time is completely wasted  
I don't feel nothing but, nothing but this

Let's face it all together, this time may last forever  
and you won't change it, ever

When you get there  
nothing really matters  
When you get there, been there, done that  
nothing really matters

Don't ever concentrate on things that eat you all up  
Don't ever feel that there is no choice, you've got to keep up  
I don't hear anything, I'm completely sheltered  
I don't feel nothing but, nothing but this

Start running, running, running  
Keep talking, talking, talking  
Keep running, running, running and screw it

# INTO THE WILD

Better stop looking for something  
cause it's all in time  
Better start looking for nothing  
we've got it all in our minds

Maybe I should get away soon, maybe I should leave today  
give me only one good reason, why I should stay

Feel it coming up, awaking rush in you  
See the sun rise up to make it brighter  
Feel it coming up, awaking rush in you  
See the sun go down to make it lighter

Better be for more than right now, cause it's all in line  
Better be for a good reason, I've got it all made up in mind

Looking for more than passing time  
Finding your way out in the wild  
All we are is fading out of sight  
We are the ones, we are

# T I D A L   W A V E S

I remember times, times that were less complicated  
Look into my eyes, feel the soaking sadness  
Look into my eyes, look into my mind and see it through  
I never realized I was more than happy  
With you by my side, feel your warming touches  
Look into my eyes, look into my mind and see it through

When everything that we went through  
Is fading, evolving to this moment when silence calls

I remember days, days when you and I first started  
Took me by surprise, how you and I, we've grown together  
Look into my eyes, look into my mind and see it through  
I never realized our love could run out  
Days were passing by, like we couldn't stop them  
Look into my eyes, look into my mind and see it through

Leave it, just leave it to this moment when  
We're fading and our lives go different ways  
Leave it, just leave it to this moment when we let it go  
And right now just let it be, this moment will set us free  
Cause right now all we can do, is let it go

# CRUSH

Come on baby show me something  
Give a little peek of something  
What you think I know about these things?  
Come on baby show me something  
I know you really want me  
I know that's how you like me

We're falling, come on over you cannot hide it  
We're falling, come closer  
Come closer, come on over, you can't deny it  
We're flying high, I can't get enough

I know you really got me  
No control that's how you like it  
Beyond the stars that's where we are  
Come on baby show me something  
Get a little peek of something

Fill up my heart, fill up my heart and soul

# M E L O D Y

Everything I have, I'm gonna keep it in my mind  
It's everything I need, I need to keep me satisfied  
And I know we all wanna see the light  
But I guess we will never see it shine

It starts all over in my head, we want everything  
Instead we've got it right, we've got it set  
We've got everything instead

Hold on!  
Everything is so far  
Everything is rising  
Hold me down in your arms  
Everything is rising  
Underneath it shows it all

# H I D E   A N D   S E E K

I'm gonna be there soon, it takes a little while  
Till it comes to this, clear as water

Hide and seek  
Nothing is golden in the night  
Don't play with the ocean

All of those memories come, rushing in  
All of those questions run, dripping all over me

There is no place where I'd rather be  
Everything is clear now and I can finally see

Fireworks bursting, illuming the night, clearing up our sight  
Twisting and sparkling high up in the sky

So alive
